Electrical Components

LED: EncapLED, an IP66-rated ETL and DLC listed LED module system, combines optics and heat sink into one configurable unit which give precise light distribution. Available in types II, III, IV & V. It allows us to do 10w., 30w. & 40w. increment adjustment on light output. The module achieves 110-120 lm/w efficacy with LUXEON LUMILEDS TX CHIPS. Beside maximizing heat dissipation surface, we also utilize convection-based heat management which creates additional air flow around each chip. Unlike a big metal heat sink where the temperature for the chips in the middle is higher than the rest, the heat of each EncapLED chip gets dissipated evenly. A better heat dissipation design keeps the junction temperature low and ultimately prolongs the life of the LED chips. Our modules are available in any of our fixture designs, as well as in a simple retro-fit kit form for existing fixtures.

HID: All ballasts are CWA/HPF regulating auto-transformers, available in HPS and Pulse-Start MH. Starting temperature for HPS is -40°F, and MH starts at -20°F. Maximum wattage is 1000W. If no specific voltage is specified and multi-tap is given, fixture will be wired at 277V as the default

Dimensions

	Size = 10	Size = 20	Size = 30
A	17"	22"	26"
B	8"	13"	13.5"
EPA	1.1	1.6	2.0

Housing

Weathertight unit spun from one-piece aluminum .080" thick, with concealed hinge. Features a .125" ballast plate and a .250" reinforcing plate for arm attachment.

Fixture Arm

A fixed bolt-on arm 6"x2"x10" long is standard. Two 3/8" bolts with nuts & washers are provided. The fixed-arm Campbell is also available with the super-fast Easy Mount slip-fit hanger arm. Post-top fixtures are available in yoke-mount style.

Finish

Thermoset polyester oven-baked powder coat, in any standard color. Custom colors are available to your specification.
